

AB Smartglass™ is a major innovation in the world of glass design. This new technology uses silver ions that are bonded with the outer layer of the glass at a microscopic scale. These silver ions prevent any organisms from replicating and kill 99.9% of all bacteria and fungi.

INNOVATION SERVING HYGIENE

Protect Patients

AB Smartglass™ protects patients. It is a perfect solution for partitioning off spaces while maintaining a transparent aspect with privacy on demand.

Prohibits bacteria transfer

AB Smartglass™ is perfect for shared areas such as bathrooms and washing areas. Additionally AB Smartglass™ is easy to clean and resistant to cleaning products.

Reduce infection risk

AB Smartglass™ can be easily applied to emergency rooms and areas of increased risk of infection. This offers another layer of defence against infection.
